Professional Summary

MCA graduate with a strong foundation in Java, Python, SQL, REST APIs, and Object-Oriented Programming. Hands-on experience building backend and full-stack applications using Flask, Django, REST APIs, and relational databases, with practical exposure to Git/GitHub and Postman for version control and API testing. Familiar with SDLC, Agile fundamentals, debugging, and testing practices, and currently expanding backend development skills with Spring Boot. Focused on backend development, API design, databases, and system design fundamentals.

Technical Skills

Programming: Java, Python, JavaScript, SQL

Backend & APIs: Spring Boot, Flask, Django, REST APIs, JSON, API Design

Frontend: React, JavaScript, HTML, CSS

Databases: MySQL, SQLite, SQL Queries, Database Design, Normalization

Software Engineering: Object-Oriented Programming, SDLC, Agile, System Design Fundamentals, Debugging, Unit Testing, Code Review

Machine Learning & AI: Machine Learning Fundamentals, Classification, Regression, OpenCV, LLM Fundamentals

Tools: Git, GitHub, Postman, VS Code

Core Concepts: Data Structures, Algorithms, Problem Solving

Experience

IoT & ML Intern, Loginware Softtech Pvt. Ltd.

Mar 2024 – Apr 2024

- Built IoT applications using Raspberry Pi and environmental sensors, handling real-time sensor data processing and calibration.
- Developed foundational machine learning models in Python and OpenCV for pattern recognition and classification tasks.

Full Stack Development Trainee, Prawatech

Aug 2024 – Oct 2024

- Completed hands-on training in Flask and Django, building REST APIs, user authentication, and CRUD-based applications.
- Practiced frontend fundamentals (HTML, CSS, JavaScript) alongside backend development and GitHub-based version control.

Projects

AI Movie Companion *FastAPI, Python, React, OMDb API*

- Built a full-stack movie search application integrating the OMDb API with a FastAPI backend and React frontend.
- Implemented AI-powered insights, trivia, and recommendation features alongside core movie search functionality.

Prayana – Ride Booking Web Application *Python, Flask, REST APIs, Leaflet.js, OpenStreetMap*

- Designed REST API endpoints using Python and Flask for trip planning, cost estimation, and user preference logic.
- Integrated Leaflet.js and OpenStreetMap for map-based route visualization and backend location handling.
- Tested and debugged API endpoints using Postman to validate request/response behavior.

Diet Recommendation System *Python, Flask, MySQL, REST APIs, React (Academic Project)*

- Built REST APIs and a MySQL-based backend to process survey-based user data for personalized diet recommendations.
- Applied object-oriented design to structure recommendation logic as part of a group academic project.
- Integrated backend APIs with a React frontend and tested data exchange between layers.

Gym Ledger *JavaScript* github.com/arunkp153/gym-ledger

- Built a gym membership management tool to track member records and fee payment status using a CRUD-oriented workflow.
- Implemented core membership and fee-tracking logic in JavaScript.

Education

Presidency University, Bengaluru, India

Master of Computer Applications (MCA) | CGPA: 8.5 2024 – 2026

RNS First Grade College, Bengaluru, India

Bachelor of Computer Applications (BCA) | CGPA: 7.9 2021 – 2024
